

## DELTA FABRICATION

### Plain Steel Expansion Tank Installation Procedures

**SERIES: DSE**

#### **VESSEL DESCRIPTION**

DSE Tanks are carbon steel, atmospheric tanks built in accordance to ASME construction for expansion in hydronic heating systems.

**ASME CODE SEC. VIII DIV. 1**

**National Board Registered**

**Carbon Steel**

**Primed Exterior**

Visually inspect tank for damage, which may have occurred during transit. If damaged delivering carrier must be notified. Please contact Delta Fabricating at 800-244-7643.

Install sight glass and tank fitting/drain combination per design requirements.

Set tank in place and pipe system to appropriate connection.

Fill system with water from system. Air cushion inside of tank will compress as water enters.

Regular inspection of the sight-glass water level is recommended periodically to ensure correct air pressure maintenance.
