

# DELTA FABRICATING

ASME Fabrication for the HVAC and  
Industrial Markets

---

**1-800-244-7643**

[www.DeltaFabricating.com](http://www.DeltaFabricating.com)

## TANGENTIAL AIR SEPARATORS

### For Removal of Entrained Air in a Hydronic System

- Tangential Centrifugal Design
- ASME code construction
- Stocked in sizes 2" – 12"
- Available with and without strainer
  
- Larger sizes and higher pressures available on request.

## BLADDER EXPANSION TANKS

### For Expansion and Contraction of system fluids due to system variances

- Available from 2 gallon to 5000 gallon
- Full acceptance removable bladders
- ASME Code Constructed and stamped
- Top or Bottom Connection Available

## CHILL WATER BUFFER TANKS

### For additional capacity in low volume chiller systems

- Standard sizes available 120 gallon to 1040 gallon
- Carbon steel construction rated @ 125
- ASME code rated and stamped
  
- Custom sizes, pressures and materials available up to 5000 gallon

## FLASH TANKS

**For flashing of high pressure condensate into steam for low pressure**

- ASME constructed and stamped
- Includes drop leg and spray pipe
- Includes handhole
- Carbon steel construction

-Higher pressures and larger sizes available

## AIR/DIRT SEPARATORS

**For removal of entrained air and particles from a hydronic system**

- Available in sizes 2" – 24"
- ASME code constructed and stamped
- High Velocity and standard velocity options
- Removable head option

-Larger sizes and pressures available upon request

## CUSTOM FABRICATED ASME VESSELS & PIPING ASSEMBLIES

Delta Fabricating has the capabilities to fabricate whatever your piping or pressure vessel needs with our state of the art facilities. We have waterjet and plasma cutters for precision and reliability. All of our welders are ASME trained and certified to ensure we provide custom products of the highest quality. Any inquiries for vessels up to 5000 gallon are encouraged. High pressures and specialized materials are also requests we excel at providing on a customized basis.

Since 1984, DELTA Fabricating has provided quality pressure vessels and tanks to their suppliers and customers. Our long tradition of excellence in our products, services, and solutions has been complimented by HVAC customers nationwide and worldwide. All of our products undergo inspection to guarantee a high level of structural and functional integrity.

At Delta, we strive to fabricate quality, certified products for low and competitive prices. As a result of our history of product dependability and economic pricing for all our tanks and pressure vessels, customer satisfaction is a sure thing. In addition to our HVAC products, we have a wide range of abilities inside our 23,000 square foot facility. We can cut, bend, roll, sheer, and weld just about anything a metal project would require, and we are open and ready for new business. Send us a drawing or specs, and we will have your quote ready in a timely manner.

Located in Northeastern Pennsylvania, we are just a 2 hour drive from New York City, Philadelphia, or shipping ports in Newark. If you are located in the continental US, our membership with shipping programs allow us to ship large items for low prices. We want your business, so don't hesitate to contact us.
